1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-5, 7-11 and 22-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As per claims 1-5 and 7-11, rejection grounds continue to be those set forth in the previous office action (Paper dated 8/11/06 paragraph 4).

As per NEW claims 22-23, the claims recite a computer program product for performing a mathematical function.

"[t]o satisfy section 101 requirements, the claim must be for a practical application of the Sec. 101 judicial exception, which can be identified in various ways:

- . The claimed invention "transforms" an article or physical object to a different state or thing.
- . The claimed invention otherwise produces a useful, concrete and tangible result,...".

See "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" OG Date: 22 November 2005.

Since there is no physical transform to establish a practical application, a useful, concrete and tangible result appears to be lacking. Therefore, claims 1-5, 7-11 and 22-23 are directed to a non-statutory process.

3. Applicants' arguments filed on 11/13/06 have been fully considered but they are not persuasive.

Applicants, in their remarks, argue that:

"[w]ith respect to the rejection of claims 1-21 under 35 U.S.C. 101, the Office Action states that claims 1-21 do not recite the method/system for a practical application. Claims 1, 4, 7, 10, and 13 have been amended by incorporating the statement "for use in encryption", so as to make claims 1,4, 7, 10, and 13 be directed to a practical application.

The support for this recitation is found on page 6, lines 9-29" (emphasis added).

With respect to the argument, the examiner carefully reviews Applicants' claimed invention. It is noted that applicants haven't pointed out how/why the claim produces a useful, concrete, and tangible result. If the claim as a whole is reasonably interpreted as just solving a mathematical algorithm rather than reciting a practical application of the algorithm which produces a **useful, concrete and tangible result**, then it would be non-statutory. It would appear to be **concrete** and **tangible** in the context of the claim; however, the **useful** result appears lacking. Therefore, the rejection is still proper.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
